

REDA ROIG

DevSecOps / DevOps Apprentice | Sept. 2026

reda.roig@gmail.com · +33 6 34 41 82 81 · linkedin.com/in/reda-roig · Paris, Île-de-France

PROFILE

Student in **Master's in Systems Design & Cybersecurity** (UPEC), I am looking for a **2-year work-study contract starting September 2026** (1 week university / 1 week company). Strong background in Python development, automation and containerised infrastructure deployment. Passionate about cybersecurity (TryHackMe top 15%), I am looking to grow and develop my skills alongside fellow enthusiasts and contribute to building robust and sustainable systems.

TECHNICAL SKILLS

Languages : Python (scripting & automation), Bash, C/C++, Java

Infrastructure & Systems : Linux/Windows (admin & hardening), Docker (containerisation & security), TCP/IP / DNS / TLS networks, Firewall, Proxy, VPN, WAF

Cloud & IaC : AWS (basics), Docker Compose, Git, CI/CD GitLab (basics), Terraform (self-training in progress)

Application Security : SAST, SCA, risk analysis, SIEM/SOAR (basics)

Tools : Flask REST API, OAuth2, InfluxDB, Grafana, Tailscale, Zammad, technical documentation

WORK EXPERIENCE

Web Developer · Netdev, Annecy Internship → Permanent *Feb. 2025 - Sept. 2025*

- ▶ **Development & security** : WordPress (JS, HTML/CSS, PHP), OVH production deployment (DNS, SSL, SSH), secure client credentials management.
- ▶ **Support & documentation** : Ticket tracking via Zammad, writing technical documentation for delivered projects.

PROJECTS

Job Tracker Personal project *2026*

- ▶ **Stack & deployment** : Python/Flask application deployed locally, accessible from mobile via Tailscale (VPN mesh); automated launch via Windows Task Scheduler.
- ▶ **Automation & API** : Gmail API integration (OAuth2) for automatic generation of follow-up drafts at D+2 and D+5; responsive web dashboard with real-time stats (Jinja2).

SmartSensorHub Final year project · IUT Annecy *2024 - 2025*

- ▶ **Infrastructure & deployment** : IoT sensor network on Raspberry Pi; containerised environment via Docker Compose (InfluxDB, Grafana, Home Assistant, Z-Wave).
- ▶ **Python Automation** : Real-time monitoring scripts (anomaly detection, automated alerts); secure InfluxDB storage with token-restricted access.
- ▶ **API & security** : Secured Flask REST API (token authentication), automatic incident reporting, complete technical documentation.

EDUCATION

Master's in Systems Design & Cybersecurity

Sept. 2026 - ongoing

Université Paris Est Créteil (UPEC)

B.U.T. Informatique

2022 - 2025

IUT Annecy, Programming (C#, Vue.js, Docker), databases, networks

LANGUAGES

French : Native (C2) **English** : Fluent (B2), 6 months UK + 1 year New Zealand **Spanish** : Basic level (A1)
